Will not occur.

SECTION 6 HEALTH HAZARD ASSESSMENT

General:
Limited toxicity data are available on this specific product; this health hazard assessment is based on the results of screening tests.

Ingestion:
No effect if ingested in small amounts. Relative to other materials, a single dose of this product is rarely toxic by ingestion. Irritation of the mouth, pharynx, esophagus and stomach can develop following ingestion.

Eye contact:
This material may cause eye irritation. Organisms used are non-pathogenic but can cause infection when in contact with open wounds. These organisms are susceptible to many commonly-used antibiotics.

Skin contact:
Slight redness on hands and forearms if individual has a history of dermal allergic reaction.
Dermatitis and skin sensitization can develop after repeated and/or prolonged contact with human skin.

Skin absorption:
Systemically toxic concentrations will probably not be absorbed through the skin in man.

SECTION 6 HEALTH HAZARD ASSESSMENT (continued)

Other effects of overexposure:
None known.

First aid procedures:
Skin: Remove contaminated clothing and footwear. Wash material off the skin with plenty of soap and water. Wash clothing and footwear before reuse.

Eyes: Immediately flush with plenty of water for at least 15 minutes and have eyes examined and treated by medical personnel.

Ingestion: Drink water or milk to dilute. Induce vomiting only if advised by physician or poison control center. Call poison control center.

SECTION 7 SPILL OR LEAK PROCEDURES

Steps to be taken in case material is released or spilled:
Where possible, flush down drain to waste treatment sewer; otherwise on small spills, use chemical absorbant and sweep up. For large spills, contain and collect.

Disposal method:
Disposal of this product or its residues must be in accordance with all local, state and Federal requirements.

SECTION 8 SPECIAL PROTECTION INFORMATION

TLV or suggested control value:
No TLV assigned to this mixture. Control of exposure to below the TLV for the ingredients (see Section 2) will be sufficient. Minimize exposure in accordance with good hygiene practices. To maintain shelf life, avoid prolonged exposure to high or low temperatures and humidity. Avoid temperatures above 110 F and keep from freezing.

Ventilation:
Normal room ventilation.

Respiratory protection (specify type):
None required for recommended use. Avoid creating aerosols in poorly ventilated areas.

Protective clothing:
None required.
